****Smart Safety QR Sticker for Your Vehicle****

****Version 1.0****

****Designed & Developed by TCreate 2026****

****www.tcreate.in/vtag****

1. Introduction -

vTag is a smart QR code sticker that you place on your vehicle's windshield. It allows anyone to scan the QR code and contact you (the vehicle owner) ****securely and privately**** — without exposing phone numbers.

In emergencies, it provides quick access to your saved emergency contacts and national helplines.

****Key Benefits****

- No phone numbers are ever displayed or shared publicly
- Private calling between scanner and owner
- Up to 4 emergency contacts
- Instant access to national helplines (police, ambulance, etc.)
- Simple OTP-based registration and use
- Affordable safety at just ₹250

3. Getting Started – Step-by-Step Setup -

Step 1: Purchase and Receive Your vTag

- Order from www.tcreate.in/vtag or authorized sellers for ₹250.
- Receive the sticker with a unique QR code (do not scratch or damage it).

Step 2: Register Your vTag

1. Open your smartphone camera or any QR scanner app.
2. **Scan the QR code** on your vTag sticker.
3. You will be redirected to the vTag registration page.
4. Enter your **phone number**.
5. Receive an **OTP via SMS** → Enter it to verify.
6. Select your **State** and **District**.
7. Click **Submit** to complete registration.

You are now logged into your **vTag user Dashboard**.

Step 3: Complete Your Profile

In the dashboard, fill in:

- **Personal Details**
 - Full Name (e.g., John Doe)
 - Email (e.g., johndoe123@gmail.com)
 - Phone Number (auto-filled from registration; editable)
- **Location Information** (State & District – auto-filled or editable)
- **Emergency Contacts** (up to 4)
 - Relation (e.g., Father, Spouse, Friend, etc)
 - Phone Number (e.g., +919988776666)

Click **Save** after each section. You can edit anytime via **Edit** buttons.

Step 4: Activate & Place the Sticker

- Once profile is complete, your vTag is active.
- Clean your windshield (inside, visible spot – recommended: upper right corner).
- Peel off the backing and **stick firmly**.
- Your vTag is now live and ready to be scanned!

4. How It Works for Others (When Someone Scans)

1. Anyone with a smartphone scans your vTag QR (no app needed – uses camera or scanner).

2. They see options:

- **Contact Vehicle Owner** → Secure private call.
- **Call Emergency Contacts** → Your saved numbers (private calling)
- **National Helplines** → Police (100/112), Ambulance (108), etc. (always available)

3. All communication is secure – **no phone numbers exposed**.

5. Dashboard Features (Access Anytime)

- Scan your own QR or visit vtag dashboard link (sent after registration).
- Sections:
 - **Personal Details** → Edit name, email, phone
 - **Location Info** → Update state/district
 - **Emergency Contacts** → Add/remove up to 4
- Logout/Re-login via OTP if needed.

6. Safety & Privacy Features

- **Private Calling**: Connections made via secure bridge – caller & owner never see each other's numbers.
- **OTP Login**: Simple, secure verification.
- **No Data Exposure**: Phone numbers stay private; only used for calling.
- **Emergency Access**: Even if you're unavailable, scanner can reach your contacts or helplines.

7. Troubleshooting

- **QR not scanning?** Ensure good lighting; clean sticker; try different scanner app.
- **No OTP received?** Check signal; request resend; verify number in profile.
- **Need to update contacts?** Log in to dashboard → Emergency Contacts → Edit.
- **Sticker damaged/lost?** Contact support at support@tcreate.in for replacement (may have fee).
- **Forgot registration?** Scan QR again to re-access.

8. Important Notes

- Keep your dashboard updated with correct emergency numbers.
- Sticker is weather-resistant but avoid extreme abrasion.

- vTag is for safety & convenience – not a tracking device.
- For support: Email support@tcreate.in or visit www.tcreate.in/vtag

****Thank you for choosing vTag – One QR. Total Safety.****
